AB SERIES

BUTTERFLY VALVES
DN50 - DN1200

DESCRIPTION

AVFI's AB Series Butterfly Valve with hard phenolic seat, pin or splined connection between disc and stem, both wafer and lug style. Suitable for most general purpose applications.

STEM CONFIGURATION

Square on sizes up to 300mm
and round on sizes 350mm.

DOUBLE O-RING

Prevents leakage from stem.

CONNECTION BETWEEN DISC & SHAFT

Pin, spline or square
connection are all available.

SEAT (LINER)

Phenolic backed, non-collapsible
with good stretch resistance,
easily replaceable.

TOP FLANGE

Top flange as per ISO 5211
standard for simple fitting of
handle or actuator.

BUSHING

Stem bushing reduces valve
torque and prevents stem
corrosion. PTFE or bronze
available.

SHAFT SEAL

Bonding of elastomer to phenolic
backing ring protects against
distortion. A common cause of
shaft leakage.

DISC

Precision profile disc provides
bubble-tight shut-off and assures
minimum torque value and long
seal life.

Note: All torque value in left chart were derived from the actual test data using water at 20°C. For torque used in other media, please contact AVFI directly. Torques shown do not include safety factor.

For actuator selection, AVFI recommends:

- For EPDM, NBR, VITON and HYPOLEN seat, these valves be multiplied by 1.35 to 1.5 for single valve applications.
- For PTFE seat, multiply the above numbers by 2.

Kindly note under certain conditions, hydrodynamic torque can meet or exceed seating and unseating torques.
